Resume of Dinesh Nair

- **LinkedIn**: https://www.linkedin.com/in/dineshn1/

- **Email**: techwriterdinesh@protonmail.com

About Me

Technical writer focused on enhancing product value through clear, actionable documentation that drives user action and understanding.

My approach is hands-on, actively working with the product, as demonstrated by the screenshots and practical examples featured in my recent work on https://dineshnair-doc.github.io/my_writings.html. I translate complex tech into clear narratives that empower users and drive sales. I am here to make your product's brilliance shine by visually demonstrating its use with practical examples, rather than simply describing it.

I have a good understanding of the Docs as Code workflow, including writing documentation in Visual Studio Code, managing version control with Git, hosting on GitHub, and publishing using a static site generator.

For API documentation, I can demonstrate how Swagger automates the generation of accurate, up-to-date documentation directly from FastAPI or Flask-RESTx API code, enhancing developer collaboration and ensuring documentation is closely integrated with the codebase.

Looking for a remote work opportunity in India or an in-office role in Hyderabad, India. Feel free to connect with me on LinkedIn or reach out to me through email at *techwriterdinesh@protonmail.com*.

Skills

Documentation & Authoring:

Oxygen XML Author, DITA, Markdown, Confluence, Vale, HTML

API Documentation & Development Tools:

Swagger (OpenAPI), Postman, REST APIs, FastAPI, Flask-RESTx

Docs as Code & Publishing:

Visual Studio Code, Git, GitHub, MkDocs

Programming & Databases:

Python (Intermediate), SQL (Intermediate)

Additional Skills:

UX Writing, Training Content Development

Experience

Technical Content Creator

dineshnair-doc.github.io | Oct 2024 - Present

- Authored a diverse range of technical content on https://dineshnair-doc.github.io, covering topics such as Python, Postman, Flask, and REST API.

- Creating clear, structured guides to simplify complex concepts for learners.

- Using **MkDocs**, **Git**, and **GitHub** to author, manage version control, and deploy the site.

- Actively learning and sharing practical, hands-on insights into technologies with others.

Documentation Insights

My explanatory articles on Medium about DITA (Darwin Information Typing Architecture) and Diataxis:

- Using DITA for Technical Documentation

- My Take on the Diátaxis Approach

Principal Technical Writer

Oracle, India | Jan 2004 - Oct 2024

- Worked across various aspects of user assistance, including user guides, UI text, release notes, and REST API documentation.

- Created training content for both instructor-led classes and online learning.

- Collaborated with product managers, developers, and UX designers to refine user-facing materials.

Education

Bachelor of Arts
Delhi University
